

Shocker

Rapid oil recovery from vehicle shock absorbers

»» **Fully Compliant**

The draining of shock absorbers is mandatory under Environment Agency regulations, The Shocker will ensure you meet all requirements.

»» **Quick and Easy**

It can drain a shock absorber in as little as one minute.

»» **Suitable for all types of shock absorber**

Oil, gas and gas over oil.

»» **Compact and robust**

Easy to store with a solid construction that means a long service life with minimum maintenance.

»» **Safe and easy removal of oil from shock absorbers**

Combines suction and gravity for a clean fast oil removal system.

- A hydraulic tool punctures the shock absorber allowing the majority of fluid to be sucked through the piercing tip.
- Any residual fluid is then extracted through the puncture hole with a suction probe
- Incorporates a seal to minimise fluid leakage and keep your workshop clean.

Shocker

Rapid oil recovery from vehicle shock absorbers

>> The recommended approach is to drain the fluid from the shock absorber without removing it from the ELV.

>> If the shock absorber is removed it is classed as hazardous waste, so it is better to drain it in situ. AutoDrain are always happy to provide advice and guidance on Environment Agency legislation and how you can become compliant.

Training

Training is vital to ensure you maximise the profitability and longevity of your Shocker and we have the following training options available for you:

- 1 Free online training information and video
- 2 Training at our own ATF in Leeds - price on application

FACT!

All End of Life Vehicles must be processed to ensure that potential pollutants such as fuel, oils, brake fluid and any other liquids are safely removed, collected and either stored or disposed of. Operators will need to ensure that vehicle depollution is carried out in a way that minimises any risk.

Watch our video online at www.autodrain.net to see how fast and simple to use the Shocker is.

Specifications:

- 90 litre storage capacity
- Stand alone compressed air operated
- H x L x W
- Weight 55kg
- Pneumatic emptying through the discharge hose
